

SCHEDULE

09:15

Monica Rathbun

You Really Should Look at the Execution Plan

Do you struggle to understand why a query is running slowly? Or why it runs in less than a second most of the time, and takes 10 minutes other times?

10:15

Travis Webb

Is Gen AI the killer app, or the final boss?

Many things appear to be taking over the world at the height of their power, but they often don't finish the job. Is GenAI the exception, or the rule? Can it give us a superior grasp of reality, or will it lead us down the rabbit hole?

11:15

Chazona Baum

How love lessons can land you a great job (even in a down tech market)

In this lighthearted but safe-for-work talk, we'll look at the attitudes, skills and strategies that will best allow you to stand out, align fit and remain compelling.

12:00

Lunch Break

12:45

Michael Buckbee

How to Lose an App in 60 seconds

Learn practical web application security survival strategies based on hundreds of real-world attacks.

01:45

Jenah Parman & Marla Schuchman

Empowering Efficiency at a National Lab through Low Code Solutions

Explore how simplicity meets innovation as we discuss the potential of low code/no code solutions in addressing internal workflow challenges.

02:45
